| Storage   | 2 years -20°C Powder, 2 weeks 4°C in DMSO, 6 months -80°C in DMSO                                                                                                                                                                                                                                                                                                                                                                            |
| Structure |  <p>The chemical structure of Cisapride is shown. It features a central piperidine ring with a methyl group on the nitrogen and a methoxy group on the adjacent carbon. A propyl chain is attached to the nitrogen, which is further linked to a 4-fluorophenyl ring. The piperidine ring is also connected to a 2-(4-chlorophenylamino)phenoxy group.</p> |
| Purity    | >98%                                                                                                                                                                                                                                                                                                                                                                                                                                         |
