Chemical Properties

CAS	215307-86-1
Formula	C ₂₁ H ₂₁ NO ₄
MW	351.4
Storage	
Structure	 <p>The chemical structure of BMS-753 is shown. It consists of a central benzene ring substituted with a tert-butyl group (C(CH₃)₃) and a carboxylic acid group (COOH). This central ring is connected via an amide bond (-NH-) to another benzene ring, which is substituted with a carboxylic acid group (COOH) at the para position.</p>
Purity	>98%
