

## Certificate of Analysis

Target	Inhibitors & Agonists>>Metabolic Enzyme/Protease>>Acetylcholinesterase (AChE)
Cat.No	DC9976
Name	(+)-Narwedine

Tel: +86-21-58447131  
Fax: +86-21-61642470

## Chemical Properties

CAS	7318-55-0
Formula	C <sub>17</sub> H <sub>19</sub> NO <sub>3</sub>
MW	285.34
Storage	
Structure	 <p>The chemical structure of (+)-Narwedine is a complex polycyclic molecule. It features a central bicyclic core with a piperidine ring fused to a cyclohexane ring. The piperidine ring has a methyl group (H<sub>3</sub>C) attached to the nitrogen atom. The cyclohexane ring has a ketone group (=O) and a hydrogen atom (H) attached to one of the carbons. The cyclohexane ring is also fused to a benzene ring, which has a methoxy group (-OCH<sub>3</sub>) attached to one of the carbons.</p>
Purity	>98%
