Chemical Properties

CAS	568-73-0
Formula	C ₁₉ H ₁₈ O ₃
MW	294.34
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The chemical structure of Tanshinone I is a complex polycyclic molecule. It features a naphthalene core with a methyl group at the 6-position. Attached to the naphthalene ring is a six-membered ring containing two carbonyl groups and a double bond. This six-membered ring is further fused to a five-membered furan ring, which has a methyl group at the 2-position.</p>
Purity	>98%, Standard References Grade
