Chemical Properties

CAS	128397-41-1
Formula	C ₂₀ H ₂₀ NO ₅
MW	354.376505851746
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The chemical structure of Hydroprotopine is a complex polycyclic molecule. It features a central piperidine ring with a methyl group (CH₃) attached to the nitrogen atom, which is shown as a blue N⁺. This piperidine ring is connected to a benzene ring that has a hydroxyl group (HO) attached. The benzene ring is further connected to a five-membered furan ring. The entire structure is drawn in black lines with red and blue highlights for the hydroxyl and nitrogen groups, respectively.</p>
Purity	>98%, Standard References Grade
