## Chemical Properties

CAS	529-44-2
Formula	C <sub>15</sub> H <sub>10</sub> O <sub>8</sub>
MW	318.24
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The image shows the chemical structure of Myricetin, a polyphenolic flavonoid. It consists of a central chromone ring system (a benzene ring fused to a pyrone ring) with three hydroxyl groups on the benzene ring and a hydroxyl group on the pyrone ring. A 3,4,5-trihydroxyphenyl group is attached to the 3-position of the pyrone ring. The hydroxyl groups are highlighted in red in the original image.</p>
Purity	>98%, Standard References Grade
