Chemical Properties

CAS	112-62-9
Formula	C19H36O2
MW	296.49
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The image shows the chemical structure of Methyl Oleate, which is a long-chain monounsaturated fatty acid ester. It consists of a 19-carbon chain with a double bond at the 9th carbon and a methyl ester group at the 1st carbon. The structure is drawn in a skeletal format with a methyl group (H₃C) and a methoxy group (O-CH₃) explicitly labeled.</p>
Purity	>98%, Standard References Grade
