Chemical Properties

CAS	509-18-2
Formula	C ₂₅ H ₄₁ NO ₇
MW	467.599
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The image shows the chemical structure of Delsoline, a complex pentacyclic alkaloid. It features a pentacyclic core with a nitrogen atom at the bridgehead. The structure is substituted with several groups: a methyl group (CH₃) and a methoxy group (OCH₃) on the left ring; a hydroxyl group (OH) and a methyl group (CH₃) on the top ring; and a methyl group (CH₃) and a methoxy group (OCH₃) on the right ring. Stereochemistry is indicated with wedges and dashes.</p>
Purity	>98%, Standard References Grade
