## Chemical Properties

CAS	14259-47-3
Formula	C <sub>28</sub> H <sub>34</sub> O <sub>14</sub>
MW	594.56
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The chemical structure of didymin is a complex polyether. It features a central chromane-like core with multiple ether linkages. The structure is highly substituted with hydroxyl groups (OH) and methyl groups (H<sub>3</sub>C). The stereochemistry is indicated with wedges and dashes. The molecule is shown in a perspective view.</p>
Purity	>98%, Standard References Grade
