Chemical Properties

CAS	786593-06-4
Formula	C ₂₈ H ₃₆ O ₁₀
MW	532.582
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The image shows the chemical structure of Dehydroandrographolidesuccinate. It is a complex polycyclic molecule with a central bicyclic core. The structure includes a furan ring, a cyclohexene ring, and a succinate group. The succinate group is shown as a chain of four carbons with two carboxylic acid groups at the ends. The structure is labeled with 'H-C' and 'O H' at various positions, and 'CH2OH' at the end of the succinate chain.</p>
Purity	>98%, Standard References Grade
