Chemical Properties

CAS	47141-42-4
Formula	C ₁₇ H ₂₅ NO ₃
MW	291.3853
Storage	
Structure	 <p>The chemical structure of Levobunolol is shown. It consists of a bicyclic core (a benzene ring fused to a six-membered ring with a carbonyl group at the 1-position and a chlorine atom at the 4-position). This core is linked via an ether oxygen to a 1-hydroxypropyl chain, which is further connected to a tert-butylamino group. The tert-butyl group is explicitly drawn with three methyl groups (CH₃) attached to a central carbon atom. The label 'Chiral' is placed above the structure.</p>
