Chemical Properties

CAS	22664-55-7
Formula	C ₁₇ H ₂₇ NO ₄
MW	309.4006
Storage	
Structure	 <p>The chemical structure of Metipranolol is shown. It consists of a central benzene ring with a chlorine atom at the 1-position, a methyl group at the 2-position, and an acetyl group at the 3-position. A propyl chain is attached to the 4-position of the benzene ring, ending in a secondary amine group with a methyl substituent. The propyl chain is drawn as a zig-zag line with a hydroxyl group (OH) on the second carbon and a nitrogen atom (NH) on the third carbon, which is bonded to a methyl group (CH₃).</p>
