Chemical Properties

CAS	
Formula	C ₂₀ H ₂₄ CAO ₁₀ S ₂
MW	528.6
Storage	
Structure	 <p>The image shows the chemical structure of Lignin calcium sulfonate. It consists of two phenyl rings connected by a methylene bridge. Each phenyl ring has a sulfonate group (-SO₃⁻) attached. The calcium ion (Ca²⁺) is shown as a separate entity, balancing the charges of the sulfonate groups.</p>
