Chemical Properties

CAS	99519-84-3
Formula	C ₁₇ H ₁₂ Cl ₃ N ₅ O ₂
MW	424.67
Storage	
Structure	 <p>The chemical structure shows a central benzene ring substituted with two chlorine atoms and a methylene group (-CH₂-). This methylene group is connected to a 1,2,4-triazole ring. The triazole ring has an amino group (-NH₂) at position 5 and a carbonyl group (-C(=O)-NH₂) at position 4. The carbonyl carbon is also bonded to a chlorine atom and a phenyl ring substituted with a chlorine atom at the para position.</p>
