Chemical Properties

CAS	
Formula	C ₉ H ₁₁ N ₅ O ₄
MW	253.21
Storage	
Structure	 <p>The chemical structure of Eritadenine is shown. It consists of a 2,4,6-triazin-5(1H)-one ring system. At the 4-position of the triazinone ring, there is a 2-amino-5-hydroxyethyl group. The amino group is labeled as 'Chiral' and 'NH₂'. The hydroxyl group is shown with a wedge bond, indicating its stereochemistry. The other hydroxyl group is part of a carboxylic acid group (-COOH) attached to the ethyl chain.</p>
