Chemical Properties

CAS	
Formula	C5H11NO2S
MW	149.2
Storage	
Structure	 <p>The chemical structure of Racemethionine is shown as a skeletal structure. It consists of a central carbon atom bonded to a hydroxyl group (HO) on the left, an amino group (NH₂) below, a propyl chain to the right, and a methylsulfanyl group (S-CH₃) at the end of the propyl chain. The propyl chain is represented by three connected line segments.</p>
