Chemical Properties

CAS	66734-13-2
Formula	C ₂₈ H ₃₇ ClO ₇
MW	521.05
Storage	
Structure	 <p>The image shows the chemical structure of Aclovate, a complex polycyclic molecule. It features a central ring system with a chlorine atom (Cl) and a deuterium atom (D) attached. There are several ester and amide groups, and a propyl chain. The structure is labeled 'Chem' and 'Cl' and 'D'.</p>
