Chemical Properties

CAS	51022-69-6
Formula	C ₂₈ H ₃₅ FO ₇
MW	502.58
Storage	
Structure	 <p>The image shows the chemical structure of Amcinonide, a complex steroid derivative. It features a multi-ring steroid nucleus with various functional groups, including a cyclopentane ring fused to the D-ring, a chlorine atom at C-17, and a side chain at C-13 containing a chlorine atom and a methyl group. The structure is labeled with 'Cl' and 'H₃C'.</p>
