Chemical Properties

CAS	
Formula	C ₂₁ H ₂₇ NO ₄
MW	357.45
Storage	
Structure	 <p>The chemical structure of (+)-Laudanosine is shown. It consists of a tropane ring system (8-methyl-8-azabicyclo[3.2.1]octane) attached to a 3,4,5-trimethoxyphenyl group. The tropane ring has a methyl group on the nitrogen atom. The phenyl ring has three methoxy groups at the 3, 4, and 5 positions. The tropane ring is connected to the phenyl ring at the 2-position.</p>
