Chemical Properties

CAS	
Formula	C ₁₃ H ₁₆ N ₂ O ₄
MW	264.28
Storage	
Structure	 <p>The image shows the chemical structure of Phenylacetylglutamine. It consists of a glutamic acid backbone where the side chain is a phenylacetyl group. The structure is labeled with 'OH' for the hydroxyl group, 'H = N' for the primary amine group, and 'C13H16N2O4' for the molecular formula. The phenyl ring is attached to the acetyl group.</p>
