Chemical Properties

CAS	
Formula	C7H16N4O2
MW	188.23
Storage	
Structure	 <p>The chemical structure of Homoarginine is shown as a skeletal structure. It consists of a 7-carbon chain. The first carbon is part of a guanidino group (C1-N1-N2-C2-N3). The fourth carbon is a chiral center with an amino group (-NH2) attached. The seventh carbon is a carboxylic acid group (-COOH). The label 'Chiral' is placed above the amino group on the fourth carbon.</p>
