Chemical Properties

CAS	
Formula	C ₁₁ H ₂₀ N ₂ O ₃
MW	228.29
Storage	
Structure	 <p>The chemical structure shows a proline ring (a five-membered nitrogen-containing ring) connected via its nitrogen atom to a prolyl side chain. The side chain consists of a methylene group (-CH₂-) attached to a chiral carbon atom. This chiral carbon is also bonded to a methyl group (-CH₃) and a carboxylic acid group (-COOH). The word "Chiral" is written above the chiral carbon atom. The labels "H-C" and "C-H₃" are placed near the methylene and methyl groups respectively.</p>
