Chemical Properties

CAS	
Formula	C ₂₁ H ₃₃ N ₃ O ₅
MW	407.51
Storage	
Structure	 <p>The image shows the chemical structure of Leucyl-leucyl-tyrosine. It consists of a tyrosine residue (a benzene ring with a hydroxyl group and a propionic acid side chain) linked via an amide bond to a leucine residue (an isobutyl side chain), which is further linked via another amide bond to a second leucine residue (an isobutyl side chain). The structure is labeled with 'H O', 'H O', 'O', 'H', 'C', 'C H', 'C H', 'C H', and 'Chiral'.</p>
