Chemical Properties

CAS	
Formula	C18H38N6O4
MW	402.54
Storage	
Structure	 <p>The chemical structure of Lysyllslylsine is a complex polycyclic molecule. It features a central core with multiple nitrogen atoms and carbonyl groups. The structure is shown in a 2D representation with various substituents, including a long alkyl chain and a methyl group. The structure is labeled with 'H-N' and 'CH3' groups.</p>
