Chemical Properties

CAS	
Formula	C ₆ H ₁₁ NO ₃ S
MW	177.21
Storage	
Structure	 <p>The image shows the chemical structure of N-Formylmethionine. It consists of a central chiral carbon atom bonded to a methylsulfanyl group (-S-CH₃), a formyl group (-CHO), a carboxylic acid group (-COOH), and a hydrogen atom. The word "Chiral" is written above the structure. The SMILES string for this molecule is <chem>CC(S)CC(NC=O)C(=O)O</chem>.</p>
