Chemical Properties

CAS	
Formula	C ₂₄ H ₃₀ N ₂ O ₇
MW	458.51
Storage	
Structure	 <p>The image shows the chemical structure of Advantame anhydrous. It consists of a central amide linkage between a 3,4,5-trihydroxyphenyl group and a 2-phenylpropanoate group. The 2-phenylpropanoate group is further linked to a 2-oxo-3-phenylpropanoate group. The structure is shown in a skeletal format with labels for the hydroxyl groups and the amide bond.</p>
