Chemical Properties

| | |
|-----------|--|
| CAS | |
| Formula | C38H53N3O3 |
| MW | 599.86 |
| Storage | |
| Structure |  <p>The image shows the chemical structure of PD-173212, a complex organic molecule. It features a central core with multiple aromatic rings, including a benzimidazole-like system, and various substituents such as a phenyl ring and a methoxy group. The structure is rendered in a ball-and-stick model with labels for atoms (C, H, N, O).</p> |
