Chemical Properties

CAS	
Formula	C ₁₁ H ₁₄ N ₂ O ₄
MW	238.24
Storage	
Structure	 <p>The image shows the chemical structure of Glycyltyrosine. It consists of a tyrosine residue (a benzene ring with a hydroxyl group at the para position and a side chain containing a hydroxyl group and a methylene group) linked to a glycine residue (a methylene group attached to an amino group). The structure is labeled 'Glycyltyrosine'.</p>
