Chemical Properties

| | |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CAS | |
| Formula | C ₁₅ H ₂₄ N ₆ O ₄ |
| MW | 352.39 |
| Storage | |
| Structure |  <p>The chemical structure shows a valacyclovir core (a cyclohexane ring with a methyl group, a hydroxyl group, and a nitrogen atom) linked via an ester bond to a 2-ethoxyethyl chain, which is further connected to a guanine base. The guanine base is shown with its characteristic hydrogen bonding sites and a carbonyl group. The ethyl group is also clearly visible.</p> |
