Chemical Properties

CAS	
Formula	C ₁₈ H ₂₈ N ₄ O
MW	316.44
Storage	
Structure	 <p>The chemical structure shows a benzene ring attached to a 5-membered heterocyclic ring containing two nitrogen atoms and one oxygen atom. This heterocyclic ring is further connected to a nitrogen atom, which is part of a tertiary amine group. This tertiary amine is bonded to two propyl chains and one butyl chain, all of which are labeled as 'C H₃'.</p>
