Chemical Properties

CAS	
Formula	C ₃₀ H ₅₀ O
MW	426.72
Storage	
Structure	 <p>The image shows the chemical structure of Lanosterol, a tetracyclic sterane. It features four fused rings (A, B, C, D) with various substituents including a hydroxyl group on ring A, a methyl group on ring B, and a long unsaturated side chain on ring D. The side chain contains a double bond and a terminal methyl group.</p>
