## Chemical Properties

CAS	
Formula	C <sub>38</sub> H <sub>70</sub> N <sub>2</sub> O <sub>13</sub>
MW	762.97
Storage	
Structure	 <p>The image shows the chemical structure of Lexithromycin, a 14-membered macrolide antibiotic. It features a large ring with multiple oxygen atoms and is substituted with several side chains, including methyl groups, hydroxyl groups, and a dimethylamino group. The structure is highly complex and is shown in a 2D representation.</p>
