Chemical Properties

| | |
|-----------|---|
| CAS | |
| Formula | C ₁₆ H ₃₃ NO ₆ |
| MW | 335.441 |
| Storage | |
| Structure |  <p>The image shows the chemical structure of MEGA-9, which is a long-chain fatty acid derivative. It features a carboxylic acid group at one end, followed by a chain of several methylene groups, and then a long alkyl chain. The structure is drawn in a skeletal format with some atoms explicitly labeled with H, O, and N.</p> |
