Chemical Properties

CAS	
Formula	C16H13N5
MW	275.315
Storage	
Structure	 <p>The chemical structure shows a central pyrimidine ring substituted at the 2-position with a propargylamino group (-NH-CH2-C≡CH) and at the 4-position with a 4-(1H-imidazol-2-yl)phenyl group. The propargylamino group is drawn with the terminal carbon of the alkyne bonded to a hydrogen atom and a methyl group (H C).</p>
