Chemical Properties

CAS	
Formula	C ₁₈ H ₁₆ O ₇
MW	344.319
Storage	
Structure	 <p>The chemical structure of Nevadensin is a complex polycyclic molecule. It features a central benzene ring with a chlorine atom at the 1-position and a methyl group at the 2-position. This benzene ring is connected to a five-membered ring containing a carbonyl group and a methyl group. The five-membered ring is further connected to a six-membered ring containing a carbonyl group and a methyl group. The structure is highly substituted with various functional groups and rings.</p>
