Chemical Properties

CAS	
Formula	C ₁₁ H ₁₂ BRFN ₆ O ₂
MW	359.1594
Storage	
Structure	 <p>The chemical structure shows a central 5-membered ring containing two nitrogen atoms and one oxygen atom. One nitrogen atom is bonded to a propylamine group (-NH-CH₂-CH₂-CH₂-NH₂). The other nitrogen atom is bonded to a carbon atom that is also bonded to a hydroxyl group (-OH) and a nitrogen atom. This nitrogen atom is further bonded to a benzene ring substituted with a bromine atom (Br) and a fluorine atom (F).</p>
