## Chemical Properties

CAS	
Formula	C <sub>20</sub> H <sub>22</sub> O <sub>4</sub>
MW	326.392
Storage	
Structure	 <p>The chemical structure of Dieugenol is a dimeric molecule consisting of two eugenol units linked at their 2-positions. Each eugenol unit features a methoxy group (-OCH<sub>3</sub>) at the 1-position and an allyl group (-CH<sub>2</sub>-CH=CH<sub>2</sub>) at the 3-position. The central linkage is a biaryl bond between the 2-positions of the two benzene rings.</p>
