Chemical Properties

CAS	
Formula	C ₂₈ H ₃₈ O ₆
MW	470.606
Storage	
Structure	 <p>The image shows the chemical structure of Withanone, a complex polycyclic molecule. It features a central pentacyclic core with a decalin-like system fused to a five-membered ring. A side chain contains a methyl ketone group and a methyl group. Another side chain is a propenyl group. The structure is highly substituted with various functional groups and stereocenters.</p>
