Chemical Properties

CAS	
Formula	C ₁₄ H ₃₂ N ₂ O ₄
MW	292.42
Storage	
Structure	 <p>The chemical structure shows two 2-hydroxypropanoate groups connected to a central ethylenediamine backbone. Each nitrogen atom of the ethylenediamine is bonded to a 2-hydroxypropyl group. The structure is symmetrical and features four hydroxyl groups and four methyl groups.</p>
