Chemical Properties

CAS	
Formula	C ₂₁ H ₂₇ N ₉ O ₃
MW	453.51
Storage	
Structure	 <p>The image shows the chemical structure of Lysine-methotrexate. It consists of a lysine molecule (a long-chain amino acid) linked to a methotrexate molecule (a folic acid derivative). The lysine part is shown as a long chain of carbon and nitrogen atoms, ending in an amino group. The methotrexate part is a complex heterocyclic structure with multiple nitrogen atoms and a carboxylic acid group. The two parts are connected via a methylene bridge.</p>
