Chemical Properties

CAS	
Formula	C ₂₁ H ₁₈ O ₉
MW	414.37
Storage	
Structure	 <p>The chemical structure of Adriamycinone is a complex polycyclic molecule. It features a central naphthoquinone core with a decalin-like ring system fused to it. The structure includes several hydroxyl groups (OH) and a methyl group (CH₃) attached to the naphthoquinone ring. A side chain is attached to the decalin ring, consisting of a methylene group (CH₂) and a hydroxyl group (OH). The structure is labeled with 'OH' and 'CH₃' at various positions.</p>
