Chemical Properties

CAS	
Formula	C ₅ H ₁₀ CL ₂ N ₄ S ₂
MW	261.18
Storage	
Structure	 <p>The chemical structure shows a central chain consisting of a thiazole ring connected to a thioamide group. The thiazole ring has a nitrogen atom at the top and a sulfur atom at the bottom. The thioamide group has a sulfur atom at the top and a nitrogen atom at the bottom. The chain is shown in a perspective view. There are two H-Cl molecules associated with the structure, one above and one below the main chain.</p>
