Chemical Properties

CAS	
Formula	C ₉ H ₂₃ NO ₃ Si
MW	221.37
Storage	
Structure	 <p>The chemical structure shows a central silicon atom (Si) bonded to three ethoxy groups (-OCH₂CH₃) and a propylamine group (-CH₂CH₂CH₂NH₂). The ethoxy groups are positioned at the top-left, top-right, and bottom-right relative to the silicon atom. The propylamine group is positioned at the bottom-left.</p>
