Chemical Properties

CAS	
Formula	C ₂₈ H ₂₂ N ₂ O ₂
MW	418.5
Storage	
Structure	 <p>The chemical structure shows a central benzene ring with two amide groups (-NH-) attached at the 1 and 3 positions. One amide group is linked to a 4-methylphenyl ring (p-tolyl), and the other is linked to a 4-methylphenyl ring (p-tolyl). The central benzene ring also has two carbonyl groups (=O) attached at the 2 and 6 positions, which are part of a phthalimide-like structure fused to a benzene ring.</p>
