Chemical Properties

CAS	
Formula	C13H10O3
MW	214.22
Storage	
Structure	 <p>The image shows the chemical structure of phenyl salicylate. It consists of a salicylic acid moiety (a benzene ring with a hydroxyl group at the 2-position) esterified with a phenyl group. The ester linkage is at the 1-position of the salicylic acid ring. The phenyl group is attached to the oxygen atom of the ester group.</p>
