Chemical Properties

CAS	
Formula	C18H26O4
MW	306.4
Storage	
Structure	 <p>The image shows the chemical structure of Diamyl phthalate. It consists of a central phthalate ring (a benzene ring with two adjacent carbonyl groups) where each carbonyl oxygen is bonded to an oxygen atom, which is in turn bonded to a four-carbon alkyl chain (the amyl group). The terminal carbon of each alkyl chain is labeled with 'H-C' and 'C-H' respectively, indicating the ends of the chains.</p>
