## Chemical Properties

CAS	
Formula	C <sub>12</sub> H <sub>16</sub> O <sub>3</sub>
MW	208.26
Storage	
Structure	 <p>The image shows the chemical structure of Amyl salicylate. It consists of a salicylic acid moiety (a benzene ring with a hydroxyl group and a carboxyl group in ortho positions) esterified with an amyl group (a five-carbon alkyl chain). The amyl group is shown as a zigzag line starting from a methyl group (H-C) and ending at the oxygen atom of the ester linkage.</p>
