Chemical Properties

CAS	
Formula	C ₈ H ₈ O ₄
MW	168.15
Storage	
Structure	 <p>The chemical structure shows a six-membered ring containing two oxygen atoms. One oxygen is part of a carbonyl group (=O) at the top. The other oxygen is part of an enol ether group (-O-CH=) on the right. A methyl group (-CH₃) is attached to the carbon of the enol ether group. At the bottom of the ring, there is a carbonyl group (=O) and a methyl ketone group (-C(=O)-CH₃) attached to the adjacent carbon.</p>
