Chemical Properties

CAS	
Formula	C ₁₁ H ₂₂ O ₂
MW	186.3
Storage	
Structure	 <p>The image shows the skeletal structure of undecanoic acid, a long-chain fatty acid. It consists of a zigzag hydrocarbon chain with 11 carbon atoms. The left end is a methyl group (CH₃), and the right end is a carboxyl group (COOH). The carboxyl group is drawn with a double bond to the oxygen and a single bond to the hydroxyl group.</p>
