Chemical Properties

CAS	
Formula	C14H14O4
MW	246.26
Storage	
Structure	 <p>The image shows the chemical structure of Diallyl phthalate. It consists of a central benzene ring with two ortho-positioned carbonyl groups (C=O). Each carbonyl group is linked via an oxygen atom to a prop-2-en-1-yl (allyl) chain. The allyl chains are shown with their terminal vinyl groups (CH2=CH-).</p>
